1. Claims 12-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 12, it is unclear how the preamble effects the scope of the claim. It is unclear what is meant by "screen" and how the integrated circuit is screen. Furthermore, it is unclear how the claimed elements are interrelated and associated with an engine control device.

2. Claims 12-14 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

It appears that the specification does not have sufficient support showing details how the integrated circuit is screened. Therefore, it is unclear how the engine control device is operated.

3. Since claims are indefinite, no art has been applied to these instant claims.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Menis et al (Pat # 5,200,696) disclose test system apparatus with schottky diodes with programmable voltages.

Hashimoto (Pat # 6,255,839) discloses voltage applied type current measuring circuit in an IC testing apparatus.
